Class 10th	K.M.W.A Vidyaniketan, Bengaluru	2015 - 2016	91.68

EXPERIENCE

➤ Internship

Tequed Labs (Research and innovation hub), Bengaluru

| Aug 2020 - Sep 2020

We (team of 4) developed a linear regression model to predict the price of used cars using the dataset obtained from an open source. Used Seaborn, Numpy, Matplotlib and Pandas libraries to generate the linear regression model. Developed a report of the efficiency obtained to the team.

PROJECTS

1. World-wise

| December 2023

A Complete React based application developed on Vite version 4. Used Context Api for state management, React-router-dom for creating the pages and navigation, React-leaflet library for maps, Json-server library to create a custom server to be running on local host and CSS modules for styling.

An application to navigate and pin point to various destinations across the globe.
